

## PHYSICAL SECURITY

# SecureSpace Security Caging

Custom-fabricated wire mesh and solid panel caging systems for colocation facilities, enterprise data centers, and high-security environments. Every installation is purpose-built to your exact floor plan, ensuring perfect fit and maximum space utilization.

**KEY FEATURES**

- ← **Welded Wire Mesh Construction**  
Heavy-gauge steel mesh panels, powder-coated for durability
- ← **Solid Panel Option**  
Steel panels for enhanced privacy and visual security
- ← **Security Fasteners**  
Tamper-resistant screws requiring special tools to remove
- ← **Custom Fabrication**  
Built to your exact dimensions, no wasted space or awkward gaps
- ← **Multiple Access Control Options**  
Key, combination, card reader, or biometric integration
- ← **Ceiling Options**  
Open, mesh, or solid ceiling panels for full enclosure

### SOLID PANEL CONFIGURATION

Panel Type	Steel with mesh top section
Privacy Level	Full visual barrier
Airflow	Top mesh for ventilation
Best For	High-security, compliance

### ACCESS CONTROL OPTIONS

Key Lock	Standard cylinder lock
Combination	Mechanical dial or digital
Card Reader	HID, proximity, or custom
Biometric	Fingerprint, retinal scan
Electronic	Networked, audit trail

### EVERY CAGE IS CUSTOM

Dimension	Range	Notes
Width	Any	Fit to your floor plan
Depth	Any	Accommodate any row layout
Height	8-12 ft typical	Match ceiling or open top
Corners	Any angle	Work around obstacles

### CONFIGURATION OPTIONS

<b>Wall Panels</b> Wire mesh, solid steel, or combination with mesh top	<b>Door Styles</b> Single/double swing, sliding, or bi-fold options
<b>Ceiling</b> Open, mesh panels, or solid for full containment	<b>Finish</b> Standard gray, black, or custom RAL colors

**Why Custom Beats Modular**

Off-the-shelf modular cages leave gaps, waste space, and look like afterthoughts. Our custom-fabricated cages fit your floor plan precisely, maximize usable area, and integrate seamlessly with your facility's infrastructure.

**Installation:** Professional installation included. Cages are floor-mounted and anchored to meet seismic and security requirements for your location.

**Process:** We survey your site, provide CAD drawings for approval, then fabricate and install to your exact specifications.
